Section C

4. Lead Auditor: Terry Gray, Owner, Gray Environmental Management

10. The facility is correcting all instances of potential non-compliance and non-conformance in a timely manner as dictated by a corporate established timeline based on severity. The facility is also working to implement suggested Best Management Practices and Opportunities for Improvement to further excel beyond regulatory requirements.

Section E- Environmental Improvement Initiative Results: Welding Emissions Reduction

The facility set an improvement initiative with the previous year's submission to reduce air emissions from welding operations by installing air pollution control devices. This was set as a multi-year goal focusing on one area at a time beginning in 2012. The project was not able to be started in 2012 as the funds were not approved for this project with the first request, thus no information was indicated in this section for progress toward meeting the goal. However, additional information is being gathered and will be resubmitted for approval in 2013.

New Environmental Improvement Initiative: Landfill Reduction- Waste Recycling

The facility currently does not have a recycling program for commonly generated and recycled wastes such as cardboard, plastics, wood pallets, etc. These materials are discarded as general refuse [along with other non-regulated materials] in a dumpster picked up and emptied daily. The facility has set a goal to implement a recycling program for at least one of these waste-streams. As indicated on the application, this does not affect an identified significant aspect, but the facility felt it appropriate and important to implement these programs.
